Pressure Washers and Automatic Parts Washers

Meets all OSHA Requirements

Engineered for Safety

**All Hotsy Standard Pressure Washers and
Automatic Parts Washers are ETL-Certified**

Pressure Washers Certified to UL-1776

Automatic Parts Washers Certified to UL-73

Meets OSHA Regulations 29 CFR 1926.403(a)

ETL-Certified-Hotsy Pressure Washers and Automatic Parts Washers

■ Pressure Washers certified to UL-1776 ■ Automatic Parts Washers certified to UL-73 ■ Meets all OSHA requirements

Engineered for Safety

Be assured you are buying a pressure washer engineered for safety. Hotsy Pressure Washers bear the ETL listed marking label.

What does it mean to be certified?

For years, electrical appliances and small equipment have carried certification seals. It is the government's way of providing consumers with confidence in the safety of manufactured products. While the government doesn't perform the actual product testing, test procedures are heavily scrutinized and endorsed by federal agencies.

Historically, the most popular certification seals were:

- ▶ Underwriter Laboratory (UL) in the U.S.
- ▶ Canadian Standards Association (CSA) in Canada

Now there are other testing laboratories that are approved by OSHA – the U.S. government's "watch dog" – who can certify a wide range of products. Among them is Intertek Testing Services (ITS), the internationally recognized laboratory used to certify Hotsy Equipment.

Why Buy Only Certified Equipment?

When it comes to product safety, there are a number of reasons businesses will want to buy only equipment that has been certified to safety standards by a Nationally Recognized Testing Laboratory (NRTL) such as UL, or in the case of Hotsy Equipment, the OSHA-approved testing lab, Intertek ETL Semko:

- ▶ **Legal Compliance:** It is now the law in the workplace, according to OSHA regulation 29 CFR 1926.403(a), that electrical equipment must be "approved" by a recognized electrical testing agency. Failure to comply can result in stiff penalties.
- ▶ **Worker Protection:** It makes good business sense to offer your workers a safe environment by providing them with the safest equipment possible.
- ▶ **Liability Protection:** In the days of costly litigation, one of your best protections against accidents on the job is to purchase only equipment that has been certified by an NRTL to rigorous safety standards.

You can be confident that all standard Hotsy Automatic Parts Washers are engineered for safety when you see the ETL listed marking.
